

# FAIR4Health

FAIR4Health is a project funded by the Science with and for Society (SwafS) call for H2020, the first FAIR principles-based collaborative health research initiative.

The FAIR4Health project is based on sharing and reusing health research datasets provided by public fundings.

The FAIRification workflow is based on the GO FAIR initiative which consists of transforming data into useful info considering legal, ethical, technical, security, cultural and behavioural terms.

1. An effective Outreach Strategy at EU level

3. Technological Platform

2. Fair Data Certification Roadmap

4. Demonstrate Potential Impacts (outcomes and health research)

## Pathfinder Case Studies:

#1 Identification of multimorbidity patterns and polypharmacy correlation on the risk of mortality in elderly

#2 Early prediction service for 30-days readmission risk in patients with Chronic Obstructive Pulmonary Disease (COPD)
